

Fermilab site access: Now and in the future

Community Advisory Board update on site access

July 27, 2023

What's happened since we last met

- Printed copies of the site access flyer to distribute in your community
- A presentation slide deck for your feedback
- Launched additional internal communications
- Temporary badges for visitor access

Fermilab Site Access: *Now and in the Future*

Background

Fermilab operates the largest accelerator complex in the United States. As one of 17 Department of Energy (DOE) laboratories, Fermilab needs to comply with safety and security regulations that will protect everyone who works at or visits the Fermilab campus. To be in compliance, Fermilab needed to change some of its site access policies and is currently working with the DOE and an internal task force on ways to balance its open, welcoming culture with the need to protect both its people and its assets.

Anticipated Site Access 2023 – early 2025

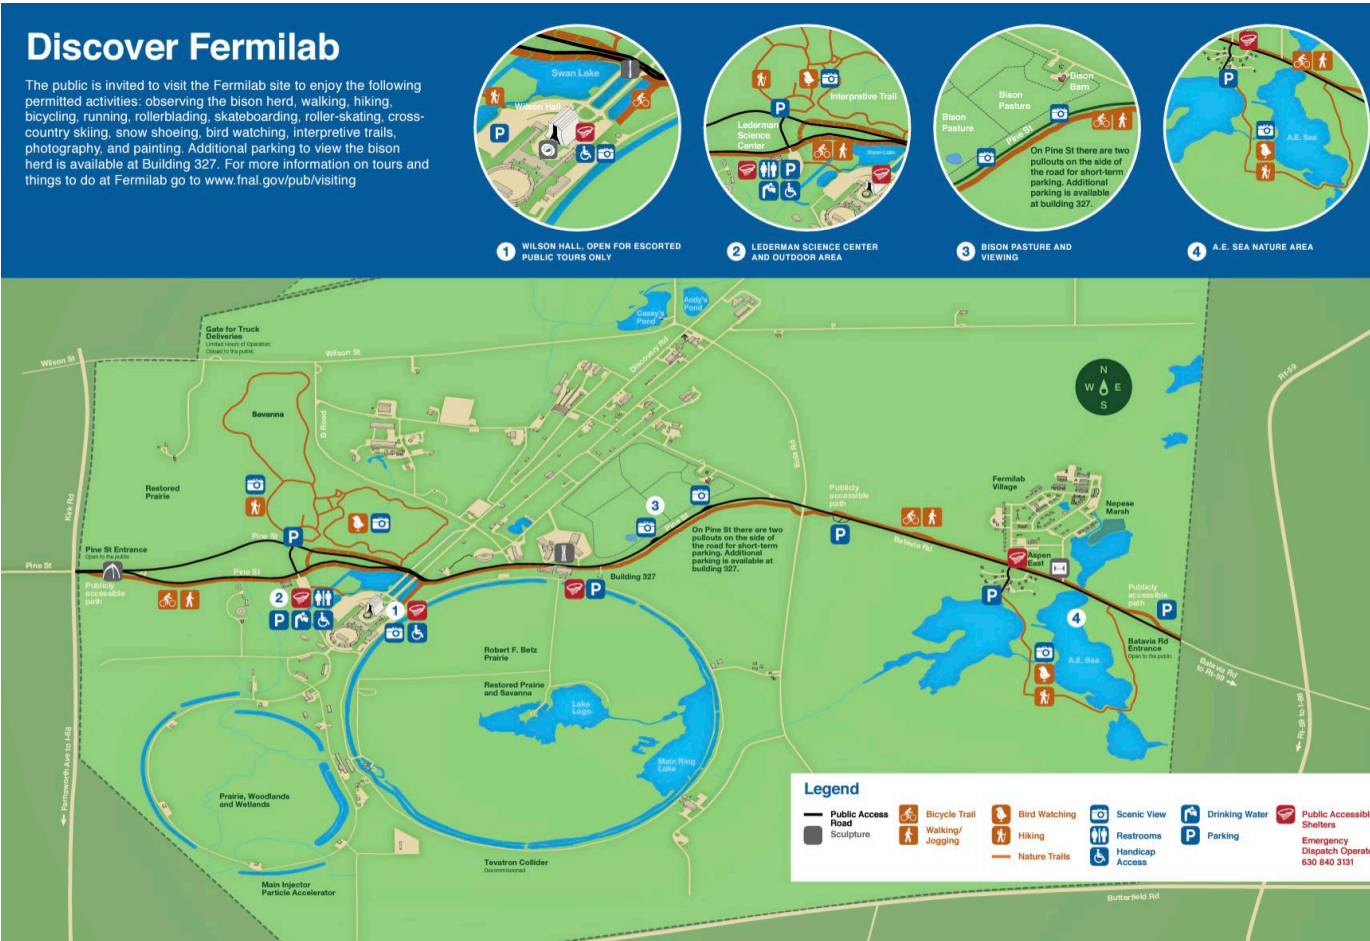

Fermilab will be upgrading badging systems to improve access to Wilson Hall (2023-2024), and build a Welcome & Access Center expected to be complete in 2025. We will be providing updates in our community newsletter, Fermilab Frontiers, and on our website: www.fnal.gov or email fermilab@fnal.gov.

Find and follow Fermilab on social media!

What's open to the public now?

With Real ID-compliant identification, Fermilab visitors can access:

- Batavia Rd. & Pine St. Gates
- Bison-viewing area
- Restored prairie trails
- Bicycling and walking trails
- On-leash dog walking
- Lederman Science Center
- Saturday Morning Physics and other STEM activities in the Ramsey Auditorium
- SAGE summer camp (HS girls)
- Field trips
- MakerSpace programming: STEM spotlight

What have we accomplished so far?

- Established a **SAB Task Force** in the fall 2022, includes employees & users – recently appointed new lead Matt K.
- **Improved on access deficiencies** identified internally and by the DOE
- Physical access process improvements and **transition to Real ID**
- **Site Access Coordinators established** and being trained
- Continuous Badging IT process improvements since 2019
 1. Multiple institutions/affiliations tracking
 2. DOE upload enhancements
 3. FNAP and Export control process enhancements
- **Additional support external & internal communications**
 - Engaged Communications Division
 - Comprehensive communications plan
 - Successful CAB engagement

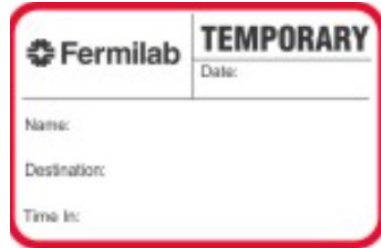

Fermilab Welcome & Access Center (FWAC)

Arriving in 2025!

New main entrance access

- The new center will provide business visitors and the public with a welcoming entrance to Fermilab
- A smoother administrative process
- Public visitors can obtain visitor passes to visit the public areas of the campus
- New employees and subcontractors will have a more efficient badging experience
- The center will provide a place for business visitors to complete any required access forms
- We expect construction to start this fall or in 2024

Temporary Badges

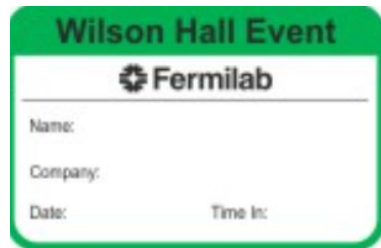

Red is for the general public

With the exception of underage participants on scheduled school tours.

Blue is for Business Visitors

Blue is for those that have had their identity verified, but do not have a Fermilab badge for an acceptable reason. Individuals who are at Fermilab for more than 1 day will be emailed a QR Code that the Security Officers will be able to scan at the control posts.

Green is for Business Visitors attending events only in Wilson Hall

Green is for those that have had their identity verified and are attending a Wilson Hall event during workdays/dawn to dusk hours. Individuals that have completed the registering process and have been approved will be emailed a QR Code that the Security Officers will be able to scan at the control posts. This does not include events that are open to the public or minors.

What is our vision for the future?

Balance openness with safety & security

- New processes & new safety & security systems
- New Welcome & Access Center
- Enhanced & more frequent communication

We value your role as a CAB member and in the community!

What leaders and community members can you recommend we meet with?
